What is OpenSIPS

OpenSIPS is one of the most used Open Source SIP Servers, if we are to count the number of calls it routes across the world. From complex end-user services to high throughput infrastructure components, OpenSIPS is undoubted a SIP Server able to deliver in thousands of deployments, for carriers, telcos or ITSPs.

OpenSIPS has a vibrant, active, and engaged global community of professional developers.

What is OpenSIPS Summit

The OpenSIPS Summit is the meeting place for the OpenSIPS community, for experts, developers and users from all over the world, looking to learn and gain knowledge. The OpenSIPS Summit is a melting pot for discussion on new technology, for sharing experiences, for brainstorming on new trends, for building bridges in the Open-Source VoIP & RTC ecosystem.
